65pr

Shree Swaminarayan Institute Of Technology   March 2021
Information Technology   Bachelor's Of Engineering
8.2

Projects

Weather App
A node.js project created using Openweather API's
🔗 https://github.com/rahilsaiyed1711/Weather-App

"Developed a dynamic weather showcase web app utilizing Node.js and Express.js, integrating OpenWeather API for real-time weather updates and data visualization."

Ecommerce dashboard
MERN project for managing products
🔗 https://github.com/rahilsaiyed1711/EcomDashboard-frontend

"Built a robust e-commerce dashboard with MERN stack, featuring CRUD operations and secure authentication. Seamlessly manage products, orders, and users with enhanced functionality and user-friendly design."

Keeper App
A Google Keep Clone using React.js
🔗 https://github.com/rahilsaiyed1711/Keeper-App

"Crafted Keeper App, a Google Keep clone, using React and Material UI dependencies. Boasts an eye-catching UI for seamless note-taking and organization, enhancing productivity and user experience."

DigiLink
A blog Creation website
🔗 https://github.com/rahilsaiyed1711/BlogWebsiteWithDB

"Developed a captivating blog post creation platform leveraging Node.js, Express.js, and Mongoose. Seamlessly blend creativity and functionality with an eye-catching UI for engaging content creation and sharing."

Chat Website
A real time chating website
🔗 https://github.com/rahilsaiyed1711/chatApp

"Proficiently developed a real-time chat website utilizing the Socket.IO library, demonstrating adept understanding of its core principles. Leveraged event-driven communication to enable seamless, bidirectional data flow between clients and server. Implemented features ensuring reliable and efficient messaging functionality, showcasing mastery of Socket.IO's capabilities. Applied robust error handling and scalability strategies to enhance the overall performance and user experience of the application."
